ABOUT ME

Informatics graduate with experience in system analysis, requirements gathering, computerized system validation, and web application development. Experienced in analyzing business and operational requirements, preparing system documentation, supporting system implementation, performing system testing, and developing dashboards for monitoring and reporting purposes. Proficient in Laravel, ReactJS, SQL, database management, and system lifecycle activities, with a strong understanding of SDLC, analytical thinking, and problem solving.

WORK EXPERIENCE

PT. Saka Farma Laboratories (Kalbe Consumer Health) **May 2025 – Present**
Quality Assurance Department – Computerized System Validation Staff | *Contract* Bekasi, Indonesia

- Analyzed and reviewed User Requirement Specifications (URS) to ensure requirements were complete, clear, traceable, and aligned with business and operational needs.
- Led meetings with system users, IT, and vendors to gather and clarify requirements, understand business processes, and align system functionality with stakeholder expectations.
- Prepared and executed system validation protocols and testing activities, including IQ, OQ, PQ, and UAT, as well as test scenario, test case, functional testing, and documentation of objective evidence.
- Performed risk and impact assessments for computerized systems to identify potential risks and determine appropriate controls and testing approaches.
- Managed User Access Request activities for computerized systems and equipment, and developed a CSV monitoring dashboard using Looker Studio to support validation tracking and reporting.
- Supported computerized system lifecycle activities, including change control, periodic review, validation maintenance, system improvement, and system retirement.

Percetakan Uang Republik Indonesia (PERURI - BUMN) **Apr 2024 – Jun 2024**
SDMO Department – Fullstack Web Developer | *Internship* Karawang, Indonesia

- Developed internal web applications for the HR Business Partner & Industrial Relations Department using Laravel based on assigned business and operational requirements.
- Designed and managed database structures to support HR operational and reporting needs.
- Performed application testing, troubleshooting, maintenance, and system improvements based on user feedback.
- Supported HR operational activities, including reviewing new employee documentation and assisting with employee recall activities.
- Created digital content and promotional materials for Life at PERURI, including social media posts and video editing.

PT. Inti Ganda Perdana (Astra Otoparts) **May 2023 – Nov 2023**
PPC Department – Fullstack Web Developer | *Internship* Karawang, Indonesia

- Developed web-based systems for the Planning Production Control (PPC) Department, including building new applications from the ground up and enhancing existing applications with new features.
- Developed and maintained application functionality using Laravel, PHP Native, MySQL, and DBeaver for database management.
- Analyzed existing application functionality and implemented system enhancements based on departmental requirements.
- Performed application testing, troubleshooting, and debugging during development and implementation.
- Deployed and installed applications directly in the production environment and supported users during system implementation.
- Utilized TortoiseSVN for source code version control and Laragon as a local development environment.

EDUCATION

University of Singaperbangsa Karawang **2020 – 2025**
Bachelor's Degree in Informatics | GPA: 3.79/4.00 Karawang, Indonesia

Skilvul – Kampus Merdeka (MSIB) **Aug 2022 – Dec 2022**
Front-End Web Developer Jakarta, Indonesia

- Strengthened skills in software engineering, HTML, CSS, JavaScript, and ReactJS.
- Collaborated in team-based web development projects.
- Implemented responsive UI/UX design principles in web applications.
